Webinar Invitation

Automated Signal Performance Measures: Using Radar Technology

Dear Missoula,

Spots are limited, but you can still join us for our webinar: **Signal Performance Measures: Using Radar Technology**.

Date: Thursday, March 14th, 2019
Time: 10:00 A.M. Central Time

Register Now!

You will find out more about:

• The highly accurate **3Dimensional-Ultra-High-Definition radar technology**;
• Types of **Signal Performance Measures (SPM)** and how they help you optimize traffic;
• The **benefits** of radar technology for freeway operations;
• Presence and Advanced zone **stats**;
…and **much more**!

We will dive into an actual data visualization dashboard. You will see how to create your own SPM charts and graphs and how this can help you operate traffic signals more efficiently and proactively.

Looking forward to seeing YOU on the webinar!

Best regards,
Dr. Reggie Chandra

CEO, Rhythm Engineering

P.S.: ASPM is so useful that The Federal Highway Administration (FHWA) is actively promoting it right now. Don’t stay behind. **Register Now**!
