Subject: the mind of Antifa
Date: Thursday, June 18, 2020 2:59:20 PM

The rumor going around is that the police at our protests have been asking participants to point out the Antifa minded among them. While anyone can call themselves Antifa and false flag agitators abound I am concerned your police have ‘drunk the cool aid’ that anti fascist sentiment is terrorism. This is the kind of irrational thinking that calls into question the quality of our police officers and their commanders. Exhibit A is holding the black bicycle rider for suspicion while not questioning the armed vigilantes who are there to support what? Adults are humans with made up minds. Those whose minds are constricted with bias and dogma to the detriment of civic inclusion of all Gods creatures are the problem and need the help of laws and mental health practitioners. We are here now. Militarizing to bring the war economy home or freeing our beloved land of the free from weaponized, fearful, dogmatic fantasy. Where is your mind?
