Subject: sewer rates
Date: Sunday, July 12, 2020 7:18:15 PM

Months ago I asked the water department why on earth they took our water usage history off the bill. The ability to immediately see how we are doing conserving a valuable resource is important. I was told there wasn't room on the new bill for this information. Apparently usage is not an issue, but now we see there must be room for the sewer bill, and now we can pay it more often, and guess what part of the new bill is tied to water usage. It seems odd that we are paying more for sewer usage during summer, as we are watering lawns, yet that water is not going down the sewer lines . Seems like yet another way to squeeze more money out of taxpayers. Yes I can probably find my usage online, but must keep working longer/harder to just afford to live here. Missoula is an a great place to live, and taxpayers are very supportive of levies/bond issues etc, but it seems spending has gotten out of control Thanks bill fischer
