Thank you, Ed. I'm looping in Jeremy Keene from Public Works. In short the NWE light replacements must be compliant with our dark skies ordinance. Jeremy could elaborate (though I believe he's gone on vacation for a bit).

Hi, Council & Commissioner.
I haven't seen the LED streetlights yet, but I saw a complaint about them.
We have a "Dark Skies Ordinance" that should address the replacement lighting.
Commissioner Strohmaier was part of the working group that put the ordinance together. He might have some thoughts on the subject.

> 8.64.090 Non-conforming Commercial, Industrial, or Multi-Family Residential light fixtures.
