Since the City Of Missoula is working to lower carbon emissions I have a couple suggestions. 1. That City of Missoula parking be posted as "no idling." I regularly see vehicles parked in City parking (leased and metered) that are idling for long periods of time even when weather conditions are mild. 2. That City of Missoula vehicles be required not to idle, specifically police vehicles. I often see officers taking their breaks/lunches and leaving their patrol cars idling in parking lots for significant periods of time. Not only does this add to emissions but it increases costs to tax payers. Idling is hard on engines and uses fuel, both of which increase costs to the City and therefore the tax payers.

Thank you
Megan Smith
