From the Missoulian (that is now printed 114 miles away):

This summer will also be the last time Caras Park looks the way it does, with the steep grass-covered hill near the music stage. The City of Missoula is planning on removing that hill late this fall for a river-pollution mitigation measure.

You have got to be kidding yourselves!! You are worried about pollution from a man made grassy knoll downtown! Are you not aware of your mountainous surroundings of the Missoula valley?!!

You people are the laughing stock of any towns government!! No wonder this is referred to as "retard town" on the internet!! https://www.reddit.com/r/SocialJusticeInAction/comments/k9gl4h/social_justice_in_my_own_hometown_a_developing/?utm_source=amp&utm_medium=&utm_content=comments_view_all
