Subject: There was Good News in 2020 -- thanks to the work of many
Date: Wednesday, December 30, 2020 6:14:20 PM

Hi friends of the earth:

2020 was a hard year for people and the planet. Yet there were good news stories also.
Below are positive stories to help you prepare to work for more progress in 2021.
UM Environmental Studies alums and students had a hand in many of these.
All involved hard work by many people.
Be sure to check out the hopeful video at the end of the list.

Missoula area news

Mountain Line mill levy was passed by voters, and Mountain Line committed to being carbon neutral by 2035.

- Italian cities see bicycle boom after COVID-19 lockdown.
- Initiative pays farmers and ranchers to keep the Amazon forest standing.
- NASA supercomputers improve carbon storage estimates.
- New company puts foot on the gas to reduce cows' methane
- UN makes strong clear statements on the need to make peace with nature

2020 inspired a great story poem (The Great Realization) --

The story is set in the future, when a child asks his parent to tell the story about life before COVID -- and the man tells of how people consumed and fouled the earth and spent more time on technology & less with each other. He told about poverty amidst plenty.
Then when COVID came, it was hard, but people started going outside more, and wildlife started coming back.
And people started caring for each other again.

The story poem shares the hope that after the pandemic is managed, people will continue practicing the good changes and not go back to the bad parts of the old way.
2020 hindsight.

Here's a link to the video of THE GREAT REALIZATION: https://www.youtube.com/watch?v=Nw5KQMXDiM4
Also available as a children's picture book, but the video has great live action clips.
(You might have to skip an ad).

So Take Heart ! Wishing you a healthy, hopeful 2021.
