Subject:	Body camera video released in fatal Texas police shooting of Joshua Feast
Date:	Friday, January 15, 2021 5:15:29 PM

Hi All,

In our neighborhoods the MPD gets to shoot us and instead of being allowed to see it on video, it's deemed CCJI (confidential criminal justice information).

The victims families are hardly even allowed to see footage and families are then undoubtedly threatened with "misuse of CCJI" if they show it to the public or anyone except their lawyer...

it's so absurd that I've heard of the Missoula city attorneys office threatening a defense council for submitting a picture of his own client (because that was CCJI).

It's pretty frustrating watching/waiting for even the slightest scraps of information from anyone at the city regarding these public killings.. killings that purportedly are justified by mpd officers... except there's not even 911/radio traffic for the events?

It's even more frustrating talking to my representatives, city attorney and mayor but not seeing anything happen...

I mean no wonder at all the city and county don't want to release the body camera footage for these officer involved killings...

I mean there's a ton of reasons:

1. Your officers prolly forgot to turn cameras on or they "malfunctioned"

2. The city/county can't even find the required public information (911 calls/police radio) when requested muchless "CCJI".

3. It would be a violation of that officers privacy, really? Bang your dead, don't violate my privacy? What garbage.

Yeeesh sounds like a mess.

Same stuff different state I guess:
https://www.nbcnews.com/news/nbcblk/body-camera-video-released-fatal-texas-police-shooting-joshua-feast-n1251951

The guy in the video doesn't look like he's got a gun to me.... Taxas police swore up and down he did though... just like MPD... maybe stop telling us what happened and just show us.

Have a great weekend!

Stay safe!

Regards,

-Matts Larson
