Dear City Council Members
Please vote NO for the educational piece that Gary Marbet has introduced to the Council for consideration. There are other more comprehensive and age appropriate materials available for this group of children. It is all about gun safety and Mr. Marbet's piece may be putting out the wrong message. Please review all available materials related to this topic if they are to be distributed to the schools.
I am curious to know why this is being presented to the City Council and not to the School Board curriculum department .
