Subject: access control face recognition
Date: Friday, July 17, 2020 8:05:57 AM

Hi,

Here share you one of the fever detection product kFace-M882 face recognition, which is widely used inoffice lobby/building,shopping center,supermarket...

It can be installed on a barrier for access control and temperature measuring ,if people get fever , Audible alarm will alarm and light turns red.
What's more, The barrier won't open..

The software can connect to a big data collecting screen , which you can easily check the records , who is in high temperature , whose is normal .
More details please contact us.
Joanna
