Subject:	Flavored vape ban
Date:	Saturday, October 3, 2020 12:37:17 PM

Please do not ban flavored vape products. It has helped myself and countless other people stop smoking. I have been vaping for over 3 years now and never had any medical problems whatsoever. When I quit smoking and started vaping, I started being able to breathe better, taste better, and not smell like nasty cigarettes. Please, flavored vape was never the problem with people getting sick. It was black market THC cartridges, and possibly JUUL, but those are terrible products anyways. The products that are sold in actual electronic cigarette shops are way higher quality. Please do not make me go back to smoking. I want to be around for my son. If you want to get rid of something, get rid of cigarettes.
