Hello City Council members,
I'd like to let you know that I support city ownership of the new High, Wide, and Handsome trail on Mount Dean Stone. I've been using the trails in and around the Missoula area for running, biking, and hiking for the last 25 years. The local trails are one of the best assets of Missoula and with the growth in population over the years, they get more and more use each year. Increasing the inventory of trails in the Missoula area will allow people to spread out more and reduce the wear and tear that is becoming evident from the heavy use. I know that not all residents of Missoula value the trail system but as someone that finds them to be very important for both physical and mental health I wanted to pass along my support.
Sincerely,

John Sieber
