Subject: Require immunization of all city residents
Date: Sunday, August 29, 2021 1:40:52 PM

Hello! Mayor Engen, Missoula City Council, Missoula County Council:

As a health practitioner and immunized city resident, and resident of Missoula county, I ask the city council and county council, to pass the requirement that all residents be immunized against COVID-19.
This could be verified by address checks and immunization records.

Why require immunization?

— to dramatically reduce the potential for risk by all,
Including and importantly - our important hospital staff! Our teachers!
— rein in the pandemic and variants,
— allow public meetings to proceed again,
— and a return to a more "normal" way of life!

Too many are refusing vaccinations, arguing the issue of freedom to decide. But there is a public health point where the balance tips the other way. Plus, by not requiring such, you prolong this "COVID" mentality of non-public meetings, missed work by those, including immunized, "possibly" exposed by others, and time wasted on this issue overall.
I liken it to public policy regarding lice infestation. If someone has lice, they don't have the freedom to go to work and spread it! The work place is allowed to send them home. They can't send their kids to school until they get rid of the lice. Freedoms only go so far!
Immunizations provide the method available to get rid of the COVID virus, essentially. All need to be immunized! It isn't perfect but it's got an excellent track record. We need to let immunization do it's job!

You as a city council working with county council have this authority.
Require immunizations of all residents and require non - immunized incoming persons wear a mask if not immunized. Stores and restaurants could be authorized to check immunization cards at door or table!

(Plus - by the way- drink anti-viral herbal teas as additional safeguard! I am happy to educate you all more on this!)

Sincerely
PeggyMMiller
