Street Improvements	Street Improvement and Major Maintenance Program		S-15	S-15	S-14

Description and justification of project and funding sources:

Most streets are designed for and have a useful life span of 20 years if no major maintenance is performed. The street improvements and major maintenance program has changed from all reconstruction to a combination of: 1) Reconstruction of completely deteriorated streets; 2) Overlays on the streets showing the most duress; and 3) Chip sealing or application of reclaimite to prolong the life of the streets with only moderate deterioration.

Overlapping, chip sealing and reclaiming before complete deterioration will extend the life of a street beyond the normal 20 years.

All sidewalk work has been transferred to the annual sidewalk replacement/installation program.

\$100,000 from the Special Road District will pay to overlay approximately 6,000 feet per year.

Maps showing proposed 2015 street improvements and maintenance are attached.
